FARBEN AUTOMATIC WATERING SYSTEM

INTRODUCTION

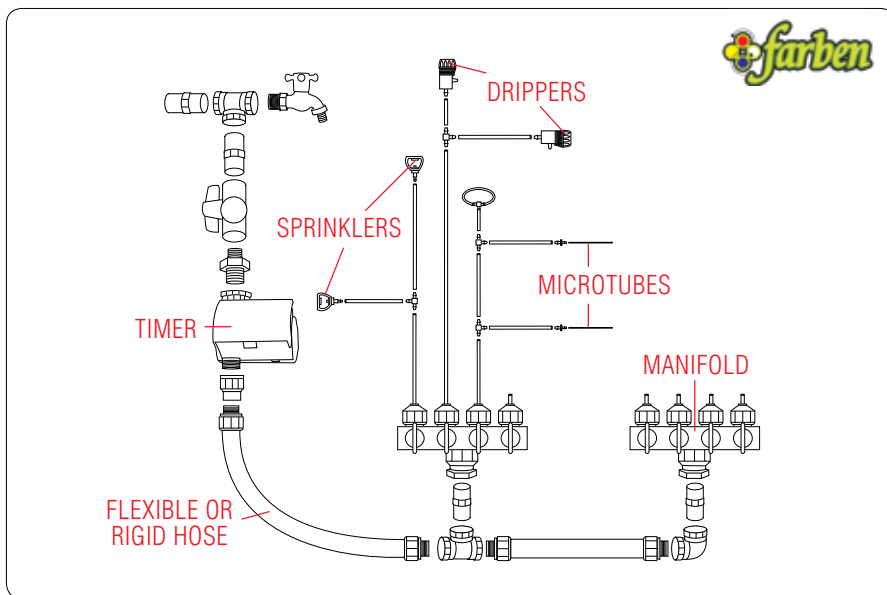

Farben system is a high pressure system with superior joints that withstand pressure and do not leak over time.

Ability to regulate water pressure at different places (Manifold) gives Farben system great flexibility. It is the only system available that can cater for horizontal & vertical landscapes at the same time. No other system in the market will meet this level of performance. Other key features of Farben system includes:

- No pumps & tanks required. (pressure at domestic water mains adequate)
- Battery operated timer. (no wires)
- Use quality material. (pipes last 30 years)
- Hoses are UV protected. (prevent hardening and cracking)
- System can fit a very wide range of water dispensing fittings. (drips, spray, mist, standing and hanging etc.)
- Caters for situations with or without water source.

Products are made in Malaysia for Malaysian market and export.

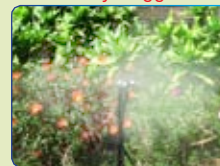

A TYPICAL WATERING SET

This system uses the combination of timer, sprinkler fogger, dripper and microtubings to water the plants.

WATER DISPENSING FITTINGS

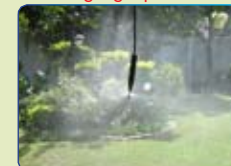

4 Way Fogger

Recommendation:
